Routine Food Inspection

SODEXHO OPERATIONS, LLC
Sodexho-Wells Fargo Home Mortgage
11200 W Parkland Av
Milwaukee, WI 53224

December 21, 2007

The following list of violations of the Wisconsin Administrative Code as adopted by reference in the Milwaukee Code of Ordinances Chapter 68, and/or other City ordinance(s) must be corrected as soon as possible but not later than the date specified. A re-inspection fee may be assessed if the violation is not corrected by that date. An inspection fee may be charged for any repeat violations.

Fee Amount: \$0.00

Code Number	Description of Violation	Correct By
3-306.11	The self serve pretzel holding unit and the self serve popcorn machine do not provide effective food shields. All food must be shielded from consumer contamination during storage and display. A first option is to prebag the popcorn and individually wrap each pretzel so they can be placed in the units for self serve. A second option is to construct shields on the units to protect from consumer contamination. If either of these options cannot be implemented, the units will need to be placed behind counters where employees will serve the consumers.	01/04/2008
7-201.11	There are chemicals being stored above the "clean" side of the 4 compartment sinks. All chemicals must be stored beneath food and food contact surfaces. Ensure that all employees know where to store chemicals when not in use. (Corrected on site)	12/21/2007
4-501.11	The left drain on the 4 compartment sink is leaking. Have the drain repaired from all leaks.	01/04/2008
4-601.11	The stove underneath the hood in the back has an accumulation of old food debris and grease. Clean the stove as often as necessary to prevent buildup of food debris and grease. Clean and maintain clean the stove.	01/04/2008
Violations	5-402.11 There are no air gaps installed at the two ice machines located in the consumer area. The air gap at the food prep sink in the kitchen area has also been replaced to an air break drain. An air gap is required at these drains to prevent waste backflow into food or food contact surfaces. Have a plumber properly install air gaps at the two ice machine drains and at the food prep sink drain in the back kitchen area.	01/04/2008
	6-101.11 There is a hole in the wall behind the mop sink. Repair the wall so that it is smooth and cleanable.

4-301.14 The panini machine is being used without a hood. If it is to remain in it's location, no 01/04/2008
butter or sprays can be used in the machine, otherwise the entire unit must be placed
underneath an approved hood.

Inspection Notes

Notes: There is no hood installed above the waffle maker. This area will be monitored by MHD. If the walls and ceilings begin to yellow or show accumulation of grease, a hood will be required to be installed.

Ensure that all cooking equipment fits underneath the hood. All cooking equipment must remain at least 6 inches underneath the hood (with doors open).

On 12/21/2007, I served these orders upon SODEXHO OPERATIONS, LLC by leaving this report with

Inspector Signature (Inspector ID: 66)

Operator Signature
